Chandrani Bera

Backend Software Engineer

chandrani09.sd@gmail.com | +91-6296077728 | Bangalore, India | linkedin.com/in/chandrani-bera-dev | github.com/chandrani09sd

Summary

Backend Software Engineer with ∼3 years of experience architecting and maintaining resilient, secure backend systems for enterprise banking platforms (Standard Chartered Bank). Specializes in Java (8/11/17/21), Spring Boot microservices, high-throughput REST APIs, zero-downtime Kubernetes deployments, and enterprise security hardening. Proven track record in developer tooling automation, cross-border production releases, and mission-critical defect resolution.

Technical Skills

Languages: Java (8/11/17/21), Python, SQL, C
Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JUnit 5, Mockito, Maven
Cloud, DevOps & Tools: Docker, Kubernetes, Azure DevOps (CI/CD), Git, Apache Airflow, SonarQube, Tomcat, Postman, Linux
APIs & Architecture: RESTful APIs, Microservices Architecture, Kong API Gateway, OpenAPI/Swagger, Distributed Tracing
Databases & Practices: PostgreSQL, MySQL, Enterprise Security Hardening (OWASP, Penetration Testing), Agile/Scrum, RCA

Professional Experience

Capgemini **09/2025 – Present**
Backend Software Engineer – IBanking Application, Standard Chartered Bank (SCB) *Bangalore, India*

- Spearheaded enterprise tech stack modernization to **Java 17 and Spring Boot 3.x**: upgraded base parent POMs, resolved complex Maven dependency conflicts, refactored breaking API changes, and overhauled test suites.
- Engineered a one-click developer installer automating certificates, secrets, ConfigMaps, and Logback configurations, shrinking local onboarding from **3–4 days to under 2 minutes**; recognized at internal engineering forum.
- Resolved **30+ critical production defects** across Malaysia, Singapore, and Hong Kong digital banking platforms, driving end-to-end fixes across development, SIT/UAT, security validation, and production rollout.
- Remediated **20+ high-severity security vulnerabilities**, drove penetration testing (SPT) compliance to secure production sign-offs, and authored **200+** JUnit and regression test cases ensuring continuous defect-free releases.
- Served as primary release developer for Hong Kong rollout, coordinating multi-branch release workflows, SIT/UAT/OAT gates, and production sign-offs with cross-functional global stakeholders.
- Validated Singapore MLR40 performance readiness by verifying batch workflows, test datasets, and API endpoints; scheduled, executed, and monitored automated data processing pipelines via **Apache Airflow**.

Capgemini **07/2024 – 09/2025**
Backend Software Engineer – CEMS Application, Standard Chartered Bank (SCB) *Bangalore, India*

- Remediated **60+ security vulnerabilities** (including 20+ critical CVEs), bolstering enterprise compliance readiness and runtime stability.
- Elevated JUnit test coverage from **40% to 60% within one month** by implementing 120+ targeted unit tests and 200+ automated regression scenarios.
- Investigated and resolved HTTP 5xx production incidents by tracing end-to-end request lifecycles (REST API → service → database) and analyzing Kubernetes runtime pod logs.
- Validated CI/CD pipeline builds in Azure DevOps and deployed approved Docker container images into Kubernetes clusters, monitoring pod health and metrics.

Projects

Coldium – Job Search & Referral Copilot | *Java 21, Spring Boot, React, TypeScript, PostgreSQL* *08/2026 – Present*

- Architected a full-stack job application copilot enabling candidates to discover openings, target relevant hiring managers, and structure personalized LinkedIn outreach with end-to-end application tracking.
- Built robust RESTful APIs in Spring Boot with PostgreSQL persistence, implementing clean data modeling, secure session handling, and optimized indexing for responsive search operations.

Social Media Web Platform | *Java, Spring Boot, Spring Security, Spring Data JPA, MySQL, Thymeleaf* *01/2024 – 05/2024*

- Engineered a secure full-stack social platform supporting user authentication, session security, profile management, and interactive content feeds; designed high-throughput RESTful APIs with MVC rendering.

Sales Forecasting Application | *Python, Machine Learning, Scikit-learn, React, REST APIs*

- Constructed an end-to-end sales prediction application; developed regression models and exposed RESTful prediction endpoints for real-time analytics with an interactive React dashboard.

Certifications

- **Microsoft Certified:** Azure Fundamentals (AZ-900)
- **Oracle:** SQL / PL-SQL Certification
- **Postman Academy:** API Testing Certification (v12)
- **Banking Domain:** L1 & L2 Certifications

Education

Kalinga Institute of Industrial Technology **06/2019 – 06/2023**
Bachelor of Technology (B.Tech) in Information Technology *Bhubaneswar, India*
